Technovation, 9 (1989) 701–702
Elsevier Science Publishers Ltd, England—Printed in the United Kingdom

Index of Titles

Actions to facilitate cooperation between industries, universities and other research organizations: attitudes and experiences of governmental institutions, 235

Adoption of flexible manufacturing systems: strategic considerations, 479

Critical factors in project implementation: a comparison of construction and R&D projects, 49

Demands for R&D activities and the trade off between in-house and external research: a viewpoint from industry with reference to large companies and small- and medium-sized enterprises, 211

Effects of governmental financing on firms' R&D activities: a theoretical and empirical investigation, 561

Elaborating a technological index for the evaluation of innovation quality, 101

Elaboration of global performance indices for evaluating durable goods, 83

Energy technology in developing countries: The scope for government policy, 431

Existing and potential capabilities for R&D activities in industry-related projects: a viewpoint from universities and other research organizations, 227

Financing high technology: the Australian venture capital market, 337

Flexible automation and firm size: some empirical evidence on the Italian case, 493

Flexible production automation: a description and definition, 389

Growth of the Korean semiconductor industry and its competitive strategy in the world market, 635

Holography — a current perspective, 505

Horizontal measure, e.g. information exchange, joint development of human resources and establishment or strengthening of common infrastructures, 271

Innovation centres and their importance for the growth of new technology-based firms: experience gained from the Federal Republic of Germany, 681

Implementing integrated technology, 321

Intrinsic laws of development of technics—Part 1, 9

Intrinsic laws of development of technics—Part 2, 23

Just-In-Time: Some marketing issues raised by popular concept in production and distribution, 401

Management information systems planning: analysis and techniques, 63

Managerial and organizational integration needs arising out of technical change and U.K. commercial structures. Part 1: Introduction and overview, 577

Managing technological change, 623

Managing technology development: perspectives of a practitioner, 551

Materials-inspired innovation in a world of routine design, 309

New organizational techniques: a case study from Venezuela, 519

Non-mass, multi-product, small-sized production: the state of the art, 357

Oxford radiocarbon accelerator unit, 109

Policies and experiences of international organizations for the promotion of enhanced interactions between industries, universities and other research organizations, 241

Project identification and definition: organizational, financial and institutional arrangements, 265

Project implementation: organizational, financial and institutional arrangements, 265

Technology transfer: an assessment of the major institutional vehicles for diffusion of U.S. biotechnology, 463

Work rules and manufacturing cells: a case study, 537
